Date Performed: April 6, 2016  
Partners: Parham Alvani

## 1 Results and Conclusions

- a. `create table "tblStudent-1"(  
stuName varchar(50),  
stuID int primary key,  
stuGrade real  
);`
- `insert into "tblStudent-1" values('Akbar',1,19);  
insert into "tblStudent-1" values('Asghar',2,2);`
- b. `alter procedure rankStu  
@grade varchar(50) output  
as`
- `declare @iman int;  
select @iman=count(*)  
from "tblStudent-1" where stuGrade <10;`
- `if @iman < 1  
set @grade = 'GOOD';  
else if @iman = 2 or @iman = 3  
set @grade = 'Normal';  
else  
set @grade = 'Bad';`
- c. `declare @res varchar(50);  
exec rankStu`

```

    @grade = @res output;
    print @res;
d. select * from "tblStudent-1";

e. create procedure updateGrade
    @num int
    as
    declare @iman as int;
    select @iman=count(*) from "tblStudent-1"
    where stuGrade < 10;
    if (@iman < @num)
    update "tblStudent-1" set stuGrade = stuGrade + 1 where 9 < stuGrade and stuGrade < 10;
    else
    update "tblStudent-1" set stuGrade = stuGrade + 0.5 where 9.5 < stuGrade and stuGrade < 10;

f. declare @num int;

    set @num = 1;
    exec updateGrade
    @num=@num;

    select * from "tblStudent-1";

g. create procedure swap
    @A int, @B int output
    as
        set @B = @A;

h. declare @res int;

    exec swap
    @A = 10,
    @B = @res output;
    print @res;

i. alter function find_student (@name varchar(50))
    returns int
    as
    begin
        declare @retval int;
        select @retval=stuGrade from "tblStudent-1" where stuName=@name;
        return @retval;
    end;

j. declare @ret int;
    exec @ret=find_student

```

```

    @name = 'Akbar';
    print @ret;

k. insert into PostalCode values (
    'Michael',
    'Blythe',
    98027
);

insert into PostalCode values (
    'Linda',
    'Mitchell',
    98027
);

insert into PostalCode values (
    'Jillian',
    'Carson',
    98027
);

insert into PostalCode values (
    'Garrett',
    'Vargas',
    98027
);

insert into PostalCode values (
    'Tsvi',
    'Reiter',
    98027
);

insert into PostalCode values (
    'Shu',
    'Ito',
    98055
);

insert into PostalCode values (
    'Jose',
    'Saraiva',
    98055
);

insert into PostalCode values (

```

```

        'Tete',
        'Mensa-Annan',
        98055
    );

insert into PostalCode values (
    'Lynn',
    'Tsofilias',
    98055
);

insert into PostalCode values (
    'Rachel',
    'Valdez',
    98055
);

insert into PostalCode values (
    'Jae',
    'Pak',
    98055
);

insert into PostalCode values (
    'Ranjit',
    'Varkey Chudukatil',
    98055
);

select FirstName, LastName
       ,row_number() over (order by p.PostalCode) as "Row Number"
       ,rank() over (order by p.PostalCode) as Rank
       ,dense_rank() over (order by p.PostalCode) as "Dense Rank"
from PostalCode as p;

l. alter function four_day_later(@d datetime)
returns int
as
begin
    declare @nd datetime;
    set @nd = dateadd(day, 4, @d);
    return datepart(day, @nd);
end;

m. declare @d datetime;
declare @res int;

```

```

set @d = getdate();
exec @res = four_day_later
@d = @d;

print @res;

n. create function test_insert(@id int)
returns int
as
begin

update "tblStudent-1" set stuID=24;
return 0;
end;

```

## 2 Screen Shots

Table - dbo.tblStudent-1		TEMP40.DB_93_...r-2-exec.sql*	
	stuName	stuID	stuGrade
	Akbar	1	19
⌵	Asghar	2	9.5
*	NULL	NULL	NULL

a.

	stuName	stuID	stuGrade
1	Akbar	1	19
2	Asghar	2	10.5

b.

C.

d.

```
create function test_insert(@id int)
returns int
as
begin

delete from "tblStudent-1";
return 0;
end;
```

Messages

Msg 443, Level 16, State 15, Procedure test\_insert, Line 6  
Invalid use of side-effecting or time-dependent operator in 'DELETE' within a function.

e.

```
TEMP40.DB_93_...\im-par-7.sql  TEMP40.DB_93_...\par-3-exec.sql  TEMP40.DB_93_...\im-par-4
create function test_insert(@id int)
returns int
as
begin
declare @hello int;
select @hello=stuID from "tblStudent-1" where stuID = @id;
return 0;
end;
```

Messages

Command(s) completed successfully.

f.

```
create function test_insert(@id int)
returns int
as
begin
|
select stuID from "tblStudent-1" where stuID = @id;
return 0;
end;
```

Messages

Msg 444, Level 16, State 2, Procedure test\_insert, Line 6  
Select statements included within a function cannot return data to a client.

g.

```
create function test_insert(@id int)
returns int
as
begin
update "tblStudent-1" set stuID=24;
return 0;
end;
```

Messages

Msg 443, Level 16, State 15, Procedure test\_insert, Line 6  
Invalid use of side-effecting or time-dependent operator in 'UPDATE' within a function.
